PROJECTS

[Developed YouTube-Inspired Platform ↗](#)

Jan 2025 - Mar 2025

Built a YouTube clone using the MERN stack with features like video uploads, user authentication via JWT, and a responsive UI. Developed a video management system for uploading videos with titles, descriptions, and thumbnails, and added a seamless video player. Implemented user interactions (likes, comments, shares), a subscription system for following channels, a video search function, and a personalized recommendation system.

[ShoppYGlobe E-commerce Application ↗](#)

Dec 2024 - Jan 2025

Developed ShoppYGlobe, an e-commerce platform enabling users to explore products, manage a cart, and complete transactions. Built a responsive UI with React and React Router for smooth navigation, and used Redux for efficient cart and state management. Integrated an API for dynamic product data fetching and optimized the app for performance and responsiveness across devices.
